

Setiap bamboo memiliki ruas. Buatlah program yang dapat mensimulasikan pemotongan banyak bamboo dengan ketentuan sebagai berikut:

- Terdapat ketentuan berapa kali siklus pemotongan banyak bamboo
- Jumlah ruas setiap bamboo disimpan dalam array
- Dalam satu siklus pemotongan, akan mengurangi masing masing bamboo sebanyak 1 ruas.

Contoh output - 1:

```
→ cut-the-bamboo node main.js
bamboos: 3,2,2
cuts: 2
initials:
|---
|--
|--
cycle cuts: 1
|--
|-
|-
cycle cuts: 2
|-
|
|
```

Contoh output -2:

```
→ cut-the-bamboo node main.js
```

```
bamboos: 5,3,2,7,1
```

```
cuts: 3
```

```
initials:
```

```
|-----
```

```
|---
```

```
|--
```

```
|-----
```

```
|-
```

```
cycle cuts: 1
```

```
|----
```

```
|--
```

```
|-
```

```
|-----
```

```
|
```

```
cycle cuts: 2
```

```
|---
```

```
|-
```

```
|
```

```
|-----
```

```
|
```

```
cycle cuts: 3
```

```
|--
```

```
|
```

```
|
```

```
|-----
```

```
|
```
